## Projects

### Review Analyzer Website: -

Built a full-stack AI-powered web application to analyze customer reviews from platforms like Google Play Store and Google Maps. Users input a brand URL, and the system fetches reviews, filters out fake ones using a custom NLP API built by our team, and summarizes genuine feedback. Interactive dashboards visualize sentiment trends over time, helping users evaluate brand reputation effectively.

### Food Recipe App: -

Designed and developed a Kotlin-based Android application that recommends food recipes based on either dish names or available ingredients. Aimed at promoting smart cooking and minimizing food waste, the app suggests creative uses for leftover items. Features include ingredient-based search, recipe filtering, and a clean, intuitive user interface for seamless user experience.

### My Portfolio Website: -

Created a responsive personal website to showcase my technical skills, projects, education, and achievements. Developed using HTML, CSS, and JavaScript with a focus on clean, professional design and smooth navigation. Acts as a digital resume and central hub for highlighting both technical and creative work.

## Extra-curricularActivities

- **volunteer at Sinusoid V5 (Tech Fest):** Part of the **Creative Team**, actively involved in making posters, origami crafts for the event.
- **Volunteer at Ingenuity (2024):** Part of the **Sponsorship Team**, actively involved in securing sponsors and managing partnerships for the event.
