Harshwardhan Saini

Pilani, Rajasthan|harshwardhan.saini22@st.niituniversity.in |+91–7357980181 | LinkedIn|Github|Portfolio

Objective

I am Harshwardhan Saini with experience in Software Development. I have worked on web and mobile applications to achieve innovative, user-focused solutions. I want to build a career as Software Developer to create impactful future.

Projects

BrandSight

- Built an **AI- powered full- stack web application** using the **MERN stack** to analyze customer reviews from Google Play Store and Google Maps for brand reputation assessment.
- Used **Postman** for testing backend endpoints and the NLP API. And **chrome DevTools** for responsiveness testing.
- Delivered an interactive dashboard to visualize sentiment trends and keywords, helping businesses detect fake reviews, understand customer sentiment, and get AI- driven improvement suggestions.

Foodies

- Used **Kotlin and XML** to develop an Android application that recommends recipes based on dish names or available ingredients.
- Used **Android Emulator** for UI testing.
- Enabled users to quickly discover relevant recipes, optimize ingredient usage, and improve cooking efficiency while reducing food wastage.

Portfolio

- Used **HTML, CSS, and JavaScript** to build a **fully responsive personal website** showcasing technical skills, projects. Serving as a digital resume for recruiters and project reviewers.
- **Chrome DevTools** for responsiveness testing.
- Created a professional online presence that improved visibility to recruiters and provided an easy way to present projects and technical expertise.

Education

NIIT University|Btech in Computer Science|2022-26

Technical Skills
